

# Track Your Diagnostic Tests

Use the spaces below to keep track of when you have diagnostic tests, the results of your tests, and the next steps you decide on together with your health care provider. Creating a plan takes your tracking one step further so that you better understand what your health care provider recommends based on your results. *Remember to make copies to use for future appointments.*

DATE	HEALTH CARE PROVIDER NAME	TEST NAME	RESULTS
------	---------------------------	-----------	---------

Use page 13 of the **You Are the Center of Your Care** brochure to identify what tests your health care provider may recommend, and work together to set goals for your results. Then use this **Track Your Tests** sheet to write down your results and any next steps your health care provider suggests.
