

Conversation Guide

Talking to your health care team may not always be easy, but it can help you better understand what to expect from your treatment plan. That may mean asking uncomfortable questions. These conversation starters may help. Check the ones you want to bring up at your next appointment. Be sure to use the notes section to write your health care provider's answers so you can refer to them later.

| | If you want to talk about... | Try saying... | Also, share... |
|-------------------|--|---|--|
| Day to day | What to expect from your medicine | I know you've explained that this medicine is right for me, but please help me understand a bit better exactly how it may help. | Things you have learned about your treatment from sources other than your health care team |
| | How to take VOTRIENT® (pazopanib) tablets | I want to be sure I take my medicine as prescribed, so let's talk about the directions again. | Concerns you have about fitting VOTRIENT into your schedule |
| | Missing doses | What do I do if I miss a dose? | Any major changes in your daily routine |
| | Having a hard time eating well | I'm not eating as much as I should be right now. What advice do you have that might work for me? | Which foods you have noticed trigger side effects |

| | If you want to talk about... | Try saying... | Also, share... |
|---------------------|-----------------------------------|---|--|
| Side effects | How to manage side effects | I'd like to know how to deal with side effects from my medicine. Could we go over my weekly symptom tracker together? | Changes you have experienced since your last visit |
| | A potential side effect | I've recently noticed something that may be a side effect of VOTRIENT. Can you let me know what you think? | Any new side effects you're noticing |

You are encouraged to report negative side effects of prescription drugs to the FDA. Please visit www.fda.gov/medwatch or call 1-800-FDA-1088.

| | If you want to talk about... | Try saying... | Also, share... |
|----------------|--------------------------------|--|---|
| Support | Finding a support group | I think it might be helpful for me to find a support group for people with my condition. Do you have any information about local groups? | How things are going with your All-Star Team |
| | Feeling anxious or sad | I've been feeling very worried and sad lately, and I wanted to mention this to you. Is this normal? | What you have been doing to cope with your feelings |

Use the space below to write down your health care provider's answers so you can reference them later.

Important Safety Information for VOTRIENT® (pazopanib) tablets

Before taking VOTRIENT, tell your health care provider if you have or had liver problems. Some people may develop liver damage while taking VOTRIENT. VOTRIENT can cause serious liver problems including death. Your health care provider will do blood tests to check your liver before you start and while you take VOTRIENT. Tell your health care provider right away if you have yellow eyes or skin, dark urine, tiredness, nausea or vomiting, loss of appetite, pain in the right upper side of your stomach area, or if you bruise easily. Your health care provider may need to prescribe a lower dose of VOTRIENT for you or tell you to stop taking VOTRIENT if you develop liver problems during treatment.

- VOTRIENT may cause irregular or fast heartbeat or fainting.
- VOTRIENT may cause heart failure; a condition where your heart does not pump as well as it should and may result in shortness of breath.
- Heart attack and stroke can happen with VOTRIENT and may cause death. Tell your health care provider if you have heart problems. Call your health care provider right away if you have chest pain or pressure, pain in your arms, back, neck or jaw, shortness of breath, numbness or weakness on one side of your body, trouble talking, headache, or dizziness.
- VOTRIENT may cause blood clots, which may form in a vein, especially in your legs. Pieces of a blood clot may travel to your lungs. This may be life threatening and cause death. Call your health care provider right away if you have

new chest pain, trouble breathing or sudden shortness of breath, leg pain, and swelling of the arms and hands, or legs and feet, a cool or pale arm or leg.

- Thrombotic microangiopathy (TMA), including thrombotic thrombocytopenia purpura and hemolytic uremic syndrome, is a condition involving blood clots that can happen while taking VOTRIENT. TMA is accompanied by a decrease in red blood cells and cells that are involved in clotting. TMA may harm organs such as the brain and kidneys.
 - VOTRIENT may cause bleeding problems, which may be severe and cause death. Tell your health care provider before taking VOTRIENT if you have a history of abnormal bleeding. If you experience unusual bleeding, bruising, or wounds that do not heal, call your health care provider right away.
 - VOTRIENT may cause a tear (called a *perforation*) in the stomach or intestinal wall. Fatal perforations have occurred. VOTRIENT may also cause an abnormal connection between 2 parts of your gastrointestinal tract (called a *fistula*). Call your health care provider if you experience pain or swelling in the stomach area, vomiting blood, or black sticky stools.
 - VOTRIENT may cause lung problems that may lead to death. Tell your health care provider right away if you develop a cough that will not go away or have shortness of breath.
 - Reversible Posterior Leukoencephalopathy Syndrome is a condition that can happen while taking VOTRIENT that may cause death. Symptoms may include headaches, seizures, lack of energy, confusion, high blood pressure, loss of speech, blindness or changes in vision, and problems thinking.
 - High blood pressure can happen with VOTRIENT, including a sudden and severe rise in blood pressure which may be life threatening. These blood pressure increases
- usually happen in the first several months of treatment. Blood pressure should be well controlled before starting VOTRIENT. Your health care provider should test your blood pressure within 1 week of starting treatment with VOTRIENT and should check it often during treatment. Get medical help right away if you have symptoms of a severe increase in blood pressure, such as severe chest pain, severe headache, blurred vision, confusion, nausea and vomiting, severe anxiety, shortness of breath, or seizures, or if you pass out (become unconscious).
- VOTRIENT may cause thyroid problems. Your health care provider should test your thyroid function during treatment with VOTRIENT.
 - VOTRIENT may affect wound healing. Tell your doctor if you had recent surgery (within the last 7 days) or are going to have surgery.
 - VOTRIENT may cause you to have too much protein in your urine. Your health care provider will check you for this problem. If there is too much protein in your urine, your health care provider may tell you to stop taking VOTRIENT.
 - Serious infections can happen with VOTRIENT and can cause death. Call your health care provider if you experience fever; cold symptoms, such as runny nose or a sore throat that does not go away; flu symptoms, such as cough, feeling tired, and body aches; pain when urinating; or cuts, scrapes, or wounds that are red, warm, swollen, or painful.
 - When used in combination with some other anticancer therapies, VOTRIENT has caused increased toxicity and even death. Tell your health care provider about all of the medicines you are taking, including other anticancer therapies.
 - VOTRIENT may harm an unborn baby (cause birth defects). Do not become pregnant while taking VOTRIENT. If you do become pregnant, tell your health care provider right away.

- A collapsed lung can happen with VOTRIENT (called *pneumothorax*). This may cause shortness of breath. Call your health care provider right away if you experience shortness of breath.

The most common side effects in people with advanced renal cell cancer who take VOTRIENT include:

- diarrhea
- high blood pressure
- hair color changes
- nausea (feeling sick to your stomach) or vomiting
- loss of appetite

Tell your health care provider right away if you have any side effects.

VOTRIENT may affect the way other medicines work and other medicines may affect how VOTRIENT works. Tell your health care provider about all the medicines you take, including prescription and nonprescription medicines and herbal and dietary supplements.

Do not eat grapefruit or drink grapefruit juice during treatment with VOTRIENT because it may affect how VOTRIENT works.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.
